WORK EXPERIENCE

Software developer
Infosys [16/07/2018 – Current]

City: Trivandrum
Country: India

◦ As a frontend developer, I have been playing a vital role in developing client and server-side web applications.
◦ Developed end-to-end Single Page Web Applications using Vue JS and React JS.
◦ Working with UI/UX Designers to fulfill customer requirements by developing new features for their end-to-end single page applications to enhance UI design using CSS, Bootstrap, React and Material UI.
◦ Collaborating with QA team to define test cases, metrics, and resolve questions about test results to improve product quality.
◦ Coordinating the workflow between the end user, Product Owner, and myself.
◦ Managing client interactions by having a good understanding of Agile and Scrum methodologies.
